FORWARD-LOOKING STATEMENTS/IMPORTANT NOTICE

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of TomTom NV (the company) and certain of the plans and objectives of TomTom and its subsidiaries (together with the company referred to as 'the group') with respect to these items. In particular the words 'expect', 'anticipate', 'estimate', 'may', 'should', 'would', 'believe' and similar expressions are intended to identify forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. Actual results may differ materially from those expressed in these forward-looking statements, and you should not place undue reliance on them. We have based these forward-looking statements on our current expectations and projections about future events, including numerous assumptions regarding our present and future business strategies, operations and the environment in which we will operate in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements. These factors include, but are not limited to, levels of customer spending in major economies, changes in consumer tastes and preferences, changes in law, the performance of the financial markets, the levels of marketing and promotional expenditures by the group and its competitors, raw materials and employee costs, changes in exchange and interest rates (in particular changes in the USD and GBP versus the euro can materially affect results), changes in tax rates, future business combinations, acquisitions or disposals, the rate of technological changes, political and military developments in countries where the company operates and the risk of a downturn in the market.

Statements regarding market share, including the company's competitive position, contained in this document are based on outside sources such as specialised research institutes, industry and dealer panels in combination with management estimates. Where full year information regarding 2014 is not yet available to the company, these statements may also be based on estimates and projections prepared by outside sources or management. Market shares are based on sales in units unless otherwise stated. The forward-looking statements contained refer only to the date in which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this annual report.

Group companies

For consolidation purposes, the assets and liabilities of entities that have a functional currency other than the group's presentation currency are translated at the closing rate at the date of the balance sheet, whereas the income statement is translated at the average exchange rate for the period. Translation differences arising thereon are recognised in 'Other comprehensive income'.

Cash flow statements

Cash flow statements are prepared using the indirect method. Cash flows from derivative instruments are classified consistently with the nature of the instrument.

3. Accounting estimates

The preparation of these financial statements requires management to make certain assumptions, estimates and judgements that affect the reported amounts of assets, liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of revision and the future periods if the revision affects both current and future periods.

The table below presents the areas that involve a higher degree of judgement or areas where assumptions and estimates are significant to the financial statements:

	Note
Revenue recognition	4
Internally generated intangible assets	12
Impairment of goodwill	14
Income tax	10 - 11
Provisions and contingent assets / liabilities	31 - 32

Detailed explanations of the degree of judgement and assumptions used are included under each of the respective sections in the notes to the financial statements as referenced above.
