FORWARD-LOOKING STATEMENTS/IMPORTANT NOTICE

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of TomTom NV (the company) and certain of the plans and objectives of TomTom and its subsidiaries (together with the company referred to as 'the group') with respect to these items. In particular the words 'expect', 'anticipate', 'estimate', 'may', 'should', 'would', 'believe' and similar expressions are intended to identify forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. Actual results may differ materially from those expressed in these forward-looking statements, and you should not place undue reliance on them. We have based these forward-looking statements on our current expectations and projections about future events, including numerous assumptions regarding our present and future business strategies, operations and the environment in which we will operate in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements. These factors include, but are not limited to, levels of customer spending in major economies, changes in consumer tastes and preferences, changes in law, the performance of the financial markets, the levels of marketing and promotional expenditures by the group and its competitors, raw materials and employee costs, changes in exchange and interest rates (in particular changes in the USD and GBP versus the euro can materially affect results), changes in tax rates, future business combinations, acquisitions or disposals, the rate of technological changes, political and military developments in countries where the company operates and the risk of a downturn in the market.

Statements regarding market share, including the company's competitive position, contained in this document are based on outside sources such as specialised research institutes, industry and dealer panels in combination with management estimates. Where full year information regarding 2014 is not yet available to the company, these statements may also be based on estimates and projections prepared by outside sources or management. Market shares are based on sales in units unless otherwise stated. The forward-looking statements contained refer only to the date in which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this annual report.

identifiable element, based on the estimated relative fair values of each identifiable element. To the extent that there is a discount on the arrangement, the discount is allocated between the elements of the contract in such a manner as to reflect the fair value of the elements and the substance of the transaction.

The amount of revenue allocated to the hardware element is recognised in line with the accounting policy for the sale of goods as described above. The revenue relating to the service element is recognised over the agreed or estimated service period on a straight-line basis, which varies on average from 3 months to 48 months (for lifetime services).

Significant estimates

The estimated sales return deduction is based upon historical data on the return rates and information on the inventory levels in the distribution channel. For sales incentives including channel- and end user rebates, the reduction in revenue is based on the group's historical experience, taking into account future expectations on rebate payments. If there is excess stock at retailers when a price reduction becomes effective, the group will compensate its customers on the price difference for their existing stock, provided certain criteria are met. To reflect the costs related to known price reductions in the income statement, an accrual is created against revenue based on an estimate of the inventory levels in the channel and future price reductions.

In the absence of a stand-alone selling price, the fair value of each element under a multiple-element arrangement is estimated using other methods allowed under IFRS, such as the cost plus reasonable margin or the residual method or a combination thereof. In making such estimates, management make use of judgement and assumptions to arrive at an outcome that best reflects a transaction's substance. Total deferred revenue balance relating to the elements deferred under such multiple-element arrangements as at 31 December 2014 amounted to €85 million (31 December 2013: €63 million).

5. Cost of sales

The group's cost of sales consists of material costs for goods sold to customers, royalty and license expenses and fulfilment costs incurred on inventory sold during the year as well as amortisation of certain technologies specifically developed/used for particular customers.

6. Personnel expenses

Included in the operating expenses are, amongst others, the following items:

| (€ in thousands) | 2014 | 2013 |
|---------------------------|----------------|----------------|
| Salaries | 155,771 | 149,200 |
| Social security costs | 26,478 | 28,572 |
| Pensions | 7,758 | 7,831 |
| Share-based compensation | 8,742 | 7,980 |
| Other ¹ | 49,596 | 48,011 |
| PERSONNEL EXPENSES | 248,345 | 241,594 |

¹ Other personnel expenses include costs of secondary benefits such as health insurance, vehicle lease costs, sales commissions and bonuses.

The average number of employees in 2014 was 3,888 (2013: 3,491) spread across the following functional areas:

| | 2014 | 2013 |
|-----------------------------------|--------------|--------------|
| Research and development | 2,602 | 2,265 |
| Marketing | 97 | 102 |
| Sales, general and administrative | 1,189 | 1,124 |
| TOTAL | 3,888 | 3,491 |

At 31 December 2014, the group had 4,172 (2013: 3,671) employees. During 2014, 2,797 of employees worked outside the Netherlands (2013: 2,351).

Pensions

The group's pension plans primarily comprise of defined contribution plans, limiting the employer's legal obligation to the amount it agrees to contribute during the period of employment and a defined benefit plan for a German subsidiary. This defined benefit plan is unfunded and has no plan asset. Management is of the opinion that the plan has limited risks to the group as it was frozen in 2007. In the extraordinary event that the group is unable to meet its obligations, the participants will receive (partial) payments from a state-owned pension protection fund.

The total pension costs of €7.8 million consist of the costs of the defined contribution plans of €7.5 million (2013: €7.6 million) and of the German-defined benefit plan of €0.3 million (2013: €0.2 million).

The movement of the German-defined benefit obligation is presented below:

| (€ in thousands) | 2014 | 2013 |
|--|-------|-------|
| PRESENT VALUE OF OBLIGATION AS AT 1 JANUARY | 6,763 | 6,572 |
| Current service cost | 36 | 24 |
